OIT 182-87
2 April 1987

MEMORANDUM FOR: Deputy Director for Administration

FROM: Edward J. Maloney
                 Director of Information Technology

SUBJECT: Weekly Report for Week Ending 3 April 1987

25X1

SECRET

6. The cutover to the new secure data/voice system took place on 27 March. All Agency outbuilding switches have been reprogrammed, coordination with other agencies is complete, and all 721 trunks have been moved to new switches. The transition to the new system was relatively trouble free, reflecting the effectiveness of the advance preparation performed. The next phase of this project, commencing on 13 April, is the installation of new secure telephones in the Headquarters Building.

8. Representatives of Corporate Data development projects for the Office of Medical Services, the Office of Personnel, and the Office of Security met to discuss common issues. Automated appointment schedulers are currently being developed by OIT for all three projects. A design for an integrated scheduler that meets a majority of the requirements for OMS and OP was proposed, and the personnel assigned to the projects have agreed to participate in the cooperative development of an integrated

25X1   system.
